

M18 x 2.5 - 1 1/4" - 1 pc | FIXTEC solution with dust extraction

- Fixtec Diamond Core System.
- The patented Milwaukee® range of FIXTEC diamond core adaptors allows changing diamond cores in a matter of seconds without the use of extra tools.
- The most common complaint with existing systems is that the diamond core locks itself tight onto the machine making it increasingly difficult to later remove the core, even with the aid of spanners and wrenches.
- However with the new FIXTEC adaptor solution from Milwaukee® this is a problem of the past, the cores can be unscrewed, removed and exchanged quite simply by hand - there is no need for spanners or wrenches.
- The revolutionary FIXTEC adaptors are available with or without dust absorption and with different tool receptions making them compatible to other manufacturers tools.
- FIXTEC Clean Liner Rotor (CLR) fits to diamond cores with 1 1/4" UNC thread. The added advantage of dust absorption allows drilling speed to be increased and extends the lifetime of the diamond cores.
