

# IDEAL AP35 H

**2-in-1 combination device: Air cleaner & humidifier combination for clean and ideally humidified indoor air. Ideal for room sizes of 25 to 45 m<sup>2</sup>\*. With HEPA and odour filter.**

## Humidification & air cleaning [2 in 1]

HEPA particulate filter

Deodor filter against odours

Cold evaporation system

4-step automatic mode

Intelligent sensors

Simple handling and cleaning

Low energy consumption

Quiet operation

Night mode

Various comfort modes

Recommended for allergy sufferers

## Technical details

|                            |                             |
|----------------------------|-----------------------------|
| Power supply               | 220-240V, 50/60 Hz          |
| Fan speed levels           | 6                           |
| Power consumption          | 4 - 25 watts                |
| Noise levels (dB)          | 26 - 52                     |
| Humidification performance | 300 ml/h                    |
| Air throughput             | up to 300 m <sup>3</sup> /h |
| Dimensions (H x W x D)     | 548 x 430 x 275 mm          |
| Weight (kg)                | 9,5                         |

\* With a room height of 2.5 m.

## Product description

The combination device guarantees a healthy room climate throughout the year and does not only ensure clean air by filtering the smallest particles from the air but also provides ideal air humidity (by means of hygienic cold evaporation) at the same time. The system combines a humidifier and an air cleaner in one device. A highly effective, multi-stage filter system filters out pollutants such as dust, particulate matter (PM10, PM2.5 and minor), pollen and allergens, pathogens such as bacteria and mould spores, cigarette smoke, exhaust fumes and odours from the indoor air. And all this running at very low energy and quiet as a whisper. Clear multi-function control display with numerous automatic and manual menu options. In automatic mode, the AP 35 H continuously monitors air humidity and air quality by means of sensors and automatically adjusts the cleaning and humidification performance. Optional manual operation. The current air quality is automatically monitored and continuously displayed via switchable LED lighting elements. In addition, the air purity and humidity values are shown in the display. Convenient water supply with removable 2.5 litre water tank – the practical handle makes filling easy. Practical filter change display. On an average, the filters have to be changed after 12 months, depending on the intensity of the usage. Four swivel castors ensure mobility and allow variable use.

# IDEAL

pure air. pure life.
