

TESTAVIT SCHUKI 1A

Socket outlet testers

The Testavit Schuki 1A and 3A socket outlet testers are essential test instruments for all professional tradesmen. They indicate all connection errors that are a risk to life at the sockets, cable drums and connection cables in 230-V installations for specific light combinations of the LEDs. Thereby, installations can be checked quickly and safely. The Testavit Schuki 1a also has an FI test function.

How you benefit:

- | Quick and safe checking of installations
- | FI test

Specifications

Technical Data	TESTAVIT SCHUKI 1A
Display	Optical, LED
Overload Category	CAT II 300 V
Dimension	60 × 60 mm
Weight	40 g
Scope of Delivery	Incl. operating instructions
Power Supply	Via test object
Protection	IP 40
Standard	IEC/EN 61010-1 (DIN VDE 0411)
Operating Voltage	230 V, 50 Hz
Error Current	30 mA
RCD Triggering	Using test butto
