

## INSULATING COVER SP 16

<b>TECHNICAL DATA</b>	Type	SP 16
	Suitable for connectors	SM 4.2, SM 4.21, SL 8.2, SL 8.21 SL 14.2, SL 25.2, Serie: SE 20, SE 21
	Max conductor cross-section	241 mm <sup>2</sup> Round 240 mm <sup>2</sup> Sector
	Test voltage	4 kV/50 Hz/1min.
	Weight	50 g
	Volume	0.00067 m <sup>3</sup>

**USE** The cover is used with Al/Al and Al/Cu connectors as insulation and to protect the connectors against corrosion caused by climatic conditions.

**CONSTRUCTION** The cover is made of weather and UV-radiation resistant special black plastic.

**INSTALLATION** After installation of connector cut off necessary caps for conductors and attach the plastic cover on the connector. Be sure that:

- the cover is closed properly i.e. the locking devices are completely closed
- the cover is in upright position i.e. the openings for condensed water drainage are downwards

**TOOLS REQUIRED** Knife

**MARKINGS** SP16

**STANDARD** SFS 4644

**PACKING** 5 pcs in a plastic bag / 10 bags in a cardboard box
