

COPPER BAR FOR TWO CONNECTORS PSS 309

TECHNICAL DATA

Type	PSS 309
Cross-section	400 mm ²
Max current	950 A
For KG connectors	KG 26
Weight	620 g

USE

Used together with busbar connectors to connect Cu- or Al-conductors to high- or low-voltage transformer bushings.

CONSTRUCTION

Flat copper bars are tin-plated to reduce corrosion between aluminium and copper. There is space for two connectors.

INSTALLATION

It is important to brush and grease the Al-connection. The copper bars and connectors are delivered separately.

TOOLS REQUIRED

Torque wrench ST 30

PACKING

25 pcs in a cardboard box
