

Megapress – Adapter for galvanised steel pipes

Megapress- New products

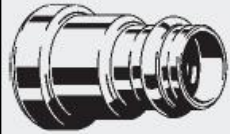

Background of the project

- In the past, galvanised steel pipes were very often used in drinking water pipelines
- These steel pipes are still present in buildings today, and are often repaired, refurbished (not completely) or extended in some cases
- There is great potential for refurbishment in Germany and other countries

Megapress- New products

Adapters onto galvanised steel pipes

NEU

Megapress-Übergangsstück mit SC-Contur

- für Stahlrohre nach
DIN EN 10220/10255 mit
Verzinkung nach DIN EN 10240
- Rotguss
- Pressanschlüsse

Ausstattung

Dichtelemente EPDM, Schneidring,
Trennring

Modell 4213.2

DN	D	d	VE	Artikel
15	½	15	5	736 255
15	½	18	5	754 679
20	¾	22	5	736 279

40	1½	42	1	736 316
50	2	54	1	736 323

Main areas of use

- Drinking water installations (cold water)
- Heating and cooling plants

Megapress- New products

Technical data

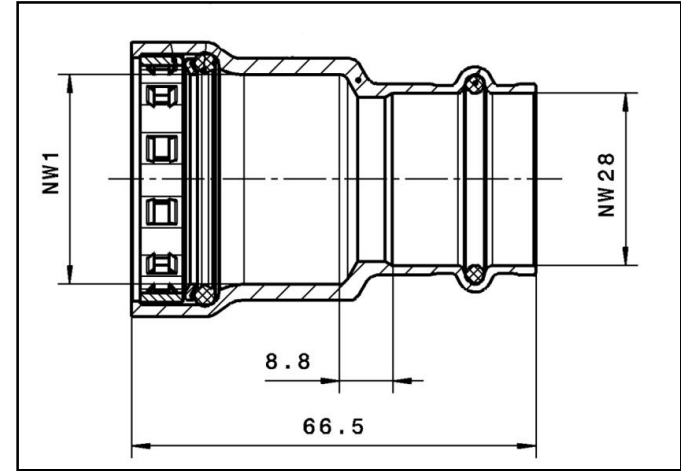

- Maximum operating pressure 1.6 MPa (16 bar)
- Maximum operating temperature 110°C
- Leaky when unpressed (SC-Contur)
- Material gunmetal
- Sealing elements EPDM
Profile seal elements + Sanpress sealing element

Pipes

- Steel pipes in acc. with EN 10255 / Galvanised in acc. with EN 10240 / EN 10216-1 / EN 10217-1 (Megapress press connection)
- Copper pipes in acc. with EN 1057 (Sanpress press connection)
- Stainless steel pipes in acc. EN 10088 / EN 10312 / DVGW- Worksheet GW 541 (Sanpress press connection)

Certification

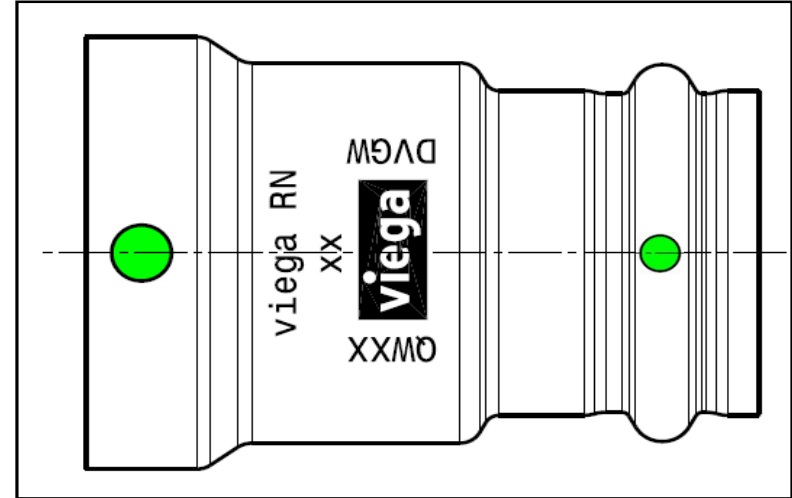

- DVGW certification in acc. with DVGW- Worksheet W 534

Megapress- New products

Marking

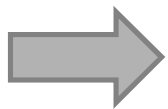

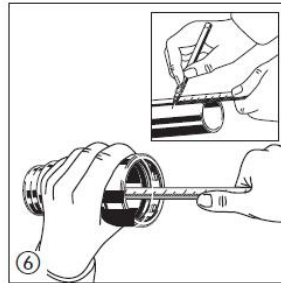

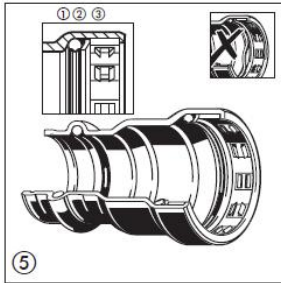

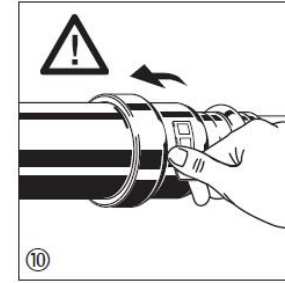

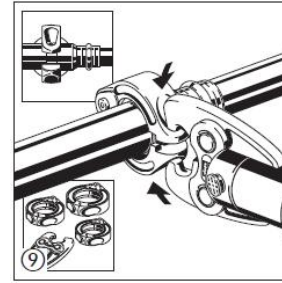

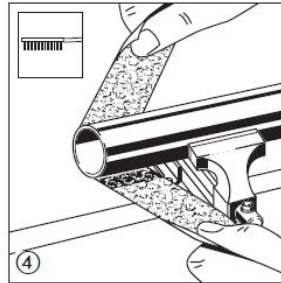

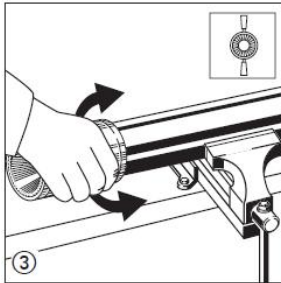

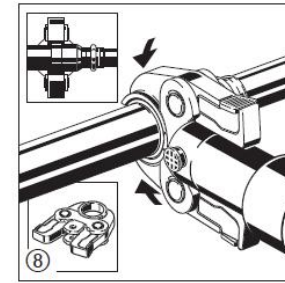

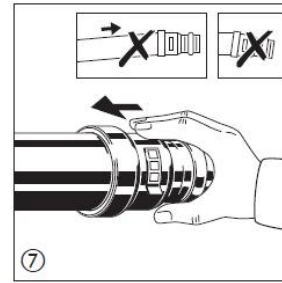

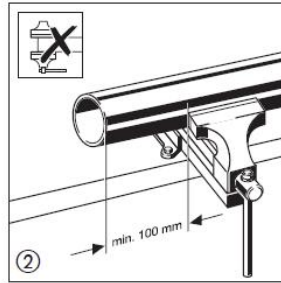

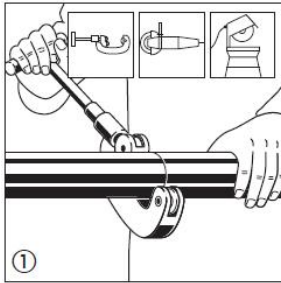

- Viega inscription
- Green “pressed” sticker on the Megapress press connection
- Green dot (SC-Contur)
- DVGW inscription

Presstools

- Megapress press connection with existing Megapress tools
- Sanpress press connection with existing Sanpress tools

Megapress- New products

Quick and simple installation!
