

The universal transmitter can be used in a wide variety of applications. You can monitor any supervised contact in such a way that hardwired devices become wireless in a fraction of time. Additionally, you can add a second battery in the unit to extend the battery lifetime to well over 5 years. The transmitter, which comes with 2 reed switches, protects anything that opens and closes such as doors, windows and cabinets. The sensor is equipped with a wall and cover tamper for additional security.

### Specifications
