

## 4 button keyfob 868 MHz Gen2

TX-4131-03-2

The 4-button keyfob is a portable wireless device allowing the customer to arm or disarm their system without having to memorise access codes or race to beat entry or exit delays. It offers two additional programmable buttons which can be used to turn on and off lights before entering the premises, activate automated garage door, X10 appliances or any other function defined in the system. It can also be used to send a panic alarm by pressing the lock and unlock buttons simultaneously.
