Description High-quality vertical cable ladder for light loads. 180° inverted U-profile cleats for cable clamps with 300 mm spacing.

The Ensto SYSTEMAL cable ladder and lighting rail system is perfect for a wide range of applications. Its sturdy aluminum structure is designed to withstand time, strain. No cost-increasing corrosion protection or maintenance is required. Aluminum is three times lighter than steel, which makes handling easier. The coating does not come off when machining, and there is no need to protect the cutting surfaces. Machining does not cause sparking and the material is easily recyclable.

Vendor Ensto Finland Oy
 Package 36 / 432 m

Technical information

Color Aluminium
 Corrosivity
 Class C3, C4
 Material Aluminum
 A 100 mm
 Weight 0,87 kg / m
