Changes to Danfoss ASV, MSV, USV and MTCV Valves

To optimize production of ASV, MSV and USV valve type at Danfoss Trata, a change has been implemented in production.

In the future the date marking and the flow direction arrow will be printed with ink-jet print on the valve house side (see picture).

Delivery

The change has already been implemented in the production at Danfoss Trata, and future deliveries to CDC will be with the new marking. Deliveries of valves with new marking will take place as soon as old stock at CDC has been used up.
