## Installation Guide

## Thermot actuator

### Technical Data

|                           |                                                         |
|---------------------------|---------------------------------------------------------|
| Supply voltage            | 24 V AC/DC (Class II (SELV)) and 230 V AC (3A pre-fuse) |
| Frequency                 | 50-60 Hz                                                |
| Running power consumption | 2 W                                                     |
| Spindle travel time       | ~3 min.                                                 |
| Ambient temperature       | 0-60° C                                                 |
| Enclosure                 | IP 41                                                   |
| Cable length              | 600 mm                                                  |
| Certificate               | CE                                                      |
