

Niagara-500

Chemical drain cleaner

Niagara-500 dissolves rapidly fats, hair, oil-residuals, soap-residuals and other organic materials in drains and drain traps.

Niagara-500 also removes unpleasant smells and bacteria.

Does not harm cast iron or standardized plastic drain pipes.

Prevents plugging when used regularly.

Instructions for use

- Ensure that the chemical is in the lower part of the container.
- Cut with a scissor along the line to open the bag.
- Pour the chemical into the drain in small amounts alternately with warm water.
- Wait for a moment. Flush carefully with warm water.
- Repeat the treatment until the drain functions normally.
- Flush with plenty of water, making sure that all of the chemical is washed away.
- When the plastic container (bag) is empty, dispose it safely.
