## Prefilter (FF)

Bad filter in a air purifier gives bad air purifying. Prefilter, FF, solves the problem

- The prefilter should stop the coarse particles from quickly clogging the Hepa filters
- There are double prefilters on each side of the machine to get the maximum possible running time from the expensive Hepa filters.
- When prefilter replacement is handled correctly, the machine supplies the correct air flow and you receive good and effective air purification over time
- The filters are supplied in packs of 20
- The machine is equipped with 4 prefilters
